

National Aeronautics and  
Space Administration

**Cosmic Origins Program Analysis Group (COPAG)  
AGN Science Interest Group (AGN SIG)  
January 11 2023**

Shobita Satyapal  
Lead, COPAG AGN Science Interest Group

*Shobita Satyapal (GMU), Gaby Canalizo (UCR), Jenna Cann (NASA/GSFC), Ron Gamble (NASA/GSFC), Erin Hicks (UoA), Vivian U (UCI)*

## AGN SIG: Highlights

- New AGN SIG began in August 2022
- Biweekly seminar series - with recorded talks on YouTube - Attendance of ~30-60 people
- Planned Monthly informal zoom lunch meetings for Faculty/Research Staff and separately for Postdocs/Grad Students
- Planned “AGN Vision Series” Colloquia - 30 minute talks followed by community discussion on most outstanding questions in the field and the current and future facilities needed to answer them.
- Discord server
- Community surveys, workshops
- Possible hybrid conference

- Multi-Institutional International Seminar series - with recorded talks on YouTube
  - Attendance of ~30-60 people
  - Students meet the speaker afterwards

Co-organizers/hosts: Shobita Satyapal (GMU), Gaby Canalizo (UCR), Misty Bentz (GSA), Erin Hicks (UoA), Vivian U (UCI), Jonelle Walsh (TAMU)

- Interest in a range of workshops topics
  - Graduate student success tips
  - Grad/postdoc fellowships
  - How to write observing proposals
  - Networking strategies for introverts
  - Burnout and how to recover
  - How to write a compelling DEI statement
  - Career spotlights
  - How to give a good talk
  - Micro-inequities
  - Imposter syndrome
  - Navigating the academic job market
  - Computational skills
  - Imposter syndrome
  - Tenure. Now what?

Would you be interested and attend workshops for early career scientists or on diversity and inclusion?

I would love to learn your tips and tricks for successful grant writing! In addition to the topics listed in this survey, workshops covering more technical areas (e.g. making high-impact figures in Python, data reduction tutorials for specific telescopes, machine learning demos, etc.) would also be interesting.

Strategies for learning computational methods. It seems a common experience that new graduate students are thrust into a project which will require them to learn languages such as python or C++, which can be a challenge. Some guidance on how to approach learning these or beginning projects with a new language may be beneficial to some.

For me personally, I think an astropy workshop focused on object oriented programming would be really useful!

Keeping up with the academic literature. For example: how to find relevant papers, tips for reading and digesting the mountain of available papers, how to keep track of papers you've found and/or read, etc. Related: a paper writing workshop.
